PROFESSIONAL SUMMARY

Versatile Full-Stack Web & Mobile Developer with hands-on experience building clean, responsive interfaces, scalable backend architectures, and intelligent AI chatbot integrations. Proficient in React, React Native, PHP/Laravel, Node.js, Google Gemini API, and modern database systems. Proven track record in shipping production-ready applications with strong attention to code quality, API security, and seamless user experiences.

TECHNICAL SKILLS

Backend: Laravel, Node.js, Express, RESTful APIs

Frontend & Mobile: React, React Native (Expo), Tailwind CSS, TanStack Query

Databases & Cloud: MySQL, SQLite, Supabase, Firebase Firestore, Redis, Cloudflare, Cloudinary

Auth & Security: JWT, Session Management

AI & Chatbot Engineering: AI Chatbot Development (Google Gemini API), Prompt Engineering, Google Antigravity, ChatGPT, Claude AI

Productivity & Office: Microsoft Office (Word, Excel, PowerPoint)

Tools & Integrations: Git, GitHub, Postman, Axios, Jira, PHPMailer, ClickSend SMS API

Workflow: Agile / Scrum, Code Review (PRs)

PROFESSIONAL EXPERIENCE

Freelance Full-Stack Developer | Independent Projects

2023 — Present

- Architected and deployed full-stack web applications, desktop SaaS tools (Tauri v2 + SQLite), and cross-platform mobile apps (React Native) for various clients and local organizations.
- Engineered e-commerce platforms, resort booking management systems, and automated grading systems with offline-first local database synchronization.
- Managed the end-to-end software lifecycle: requirements analysis, UI prototyping, database schema modeling, backend RESTful API construction, and cloud hosting deployment.

Project Developer | Paubra

2024

- Collaborated with senior software engineers in building and testing a full-stack mobile application.
- Applied Agile/Scrum methodologies using Jira for sprint planning, task breakdown, and daily standups.
- Maintained version control on GitHub: handled pull requests, resolved merge conflicts, and conducted code reviews to ensure codebase integrity and maintainability.
- Implemented reusable frontend UI components and integrated backend API endpoints with robust error handling.

Web Designer & Developer (WordPress) | DEVOPT Company

2025

- Revamped client WordPress websites, optimizing UI/UX aesthetics, mobile responsiveness, and page loading speed.
- Developed customized WordPress themes and plugins aligned with specific business requirements and SEO standards.
- Collaborated closely with design and project leads to deliver high-converting, cross-browser compatible web experiences.

EDUCATION

Bachelor of Science in Information Technology (BSIT) | Veritas College of Irosin

2021 — 2025

HONORS & CERTIFICATIONS

- Champion — Basic Programming Rumble Competition — Veritas College of Irosin
- Career Essentials in Software Development — Microsoft & LinkedIn
- Programming Foundations: Beyond the Fundamentals — LinkedIn Learning
- Introduction to Career Skills in Software Development — LinkedIn Learning
